Hair Thriving Technology

ANiKINE  
Exosome • Skincare

# ANIKINE Collection

Not limited as a professional hair restoration solution,  
But also a pioneer in exosome technology.

Bring an unparalleled hair regeneration experience.  
Embrace fullness and shining hair with confidence.  
Reactivate the growth of healthy hair.

## 25 Years Regenerative Medicine Experience

BIONET exosomes present under exclusive nano-purification technology. With rapid and stable production techniques, BIONET is capable of large-scale production of exosomes with high purity and quality standards.

## Instant Absorption

Nanofiltration exosomes with double lipid membranes.  
Patented delivery agents penetrate deeper skin layers.

## Excellent Compatibility

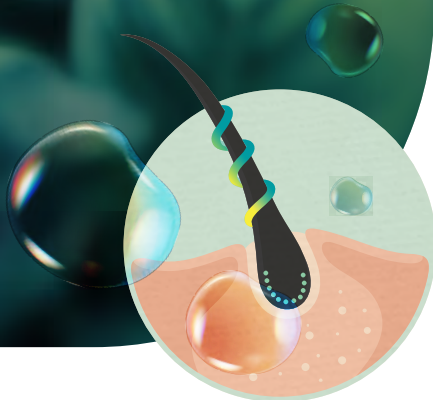

Free of toxins and irritants, ideal for sensitive skin.  
Exosome materials certified under INCI names.

## Revitalizing Renewal

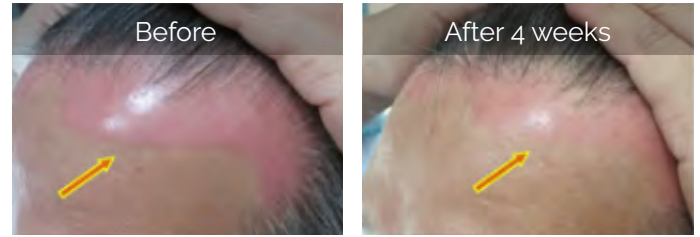

Extracts numerous growth factors and cytokines to rejuvenate skin.  
Deeply stimulates skin regeneration and activates self-repair.

## Dual-form Repair

Effectively sealing active ingredients and blending with regenerative essence to restore confidence with silky and shiny hair.

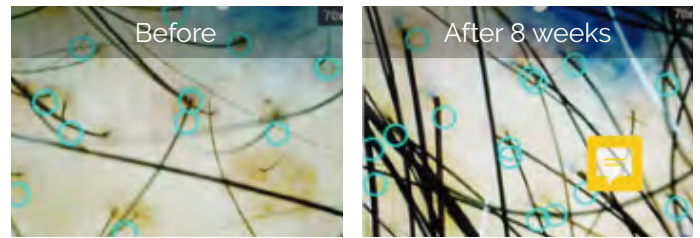

## Scalp Wellness

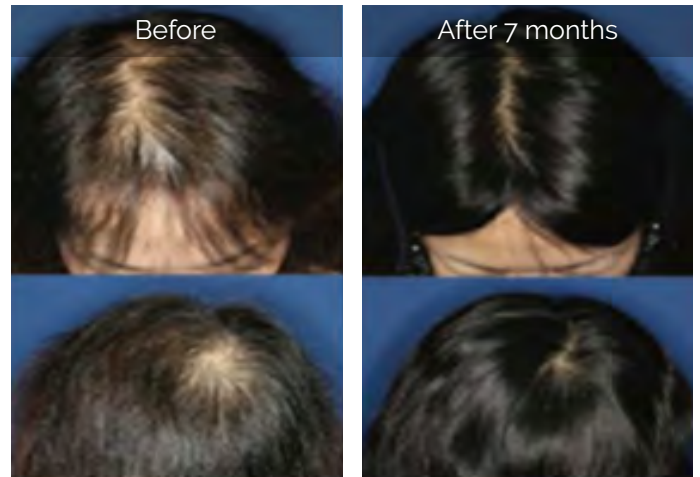

Use ANIKINE for 4 weeks to promote healthy scalp condition.

## Root Strengthening

Use ANIKINE for 8 weeks to increase hair density.

Use exosomes with noticeable hair volume improvement.

Hirotao Fukuoka, Hair Regeneration Treatment Using Adipose-Derived Stem Cell Conditioned Medium: Follow-up With Trichograms. *Eplasty*. 2015; 15: e10.

## Exosome – New Hair Restoration Favorite

Exosomes are nano-sized extracellular vesicles (EVs) derived from stem cells that are capable of rapid absorption and can aid in activating signals within follicle cells to strengthen hair.
